

N’CAM (Bassar) Primer Construction Project 2026 (PCW)

Project Title

N’Cam (Bassar) Primer Construction Project 2026.
Development of a Biblical Literacy Primer in N’Cam (Bassar) – LEI

Context and Justification

N’Cam (Bassar) is spoken by over 680,000 people in Togo and northern Ghana. Although the full Bible is available in this language, literacy rates remain low (1% to 60%), especially among women in rural areas. This limits access to Scripture, basic education, and essential health and development information.

Objective

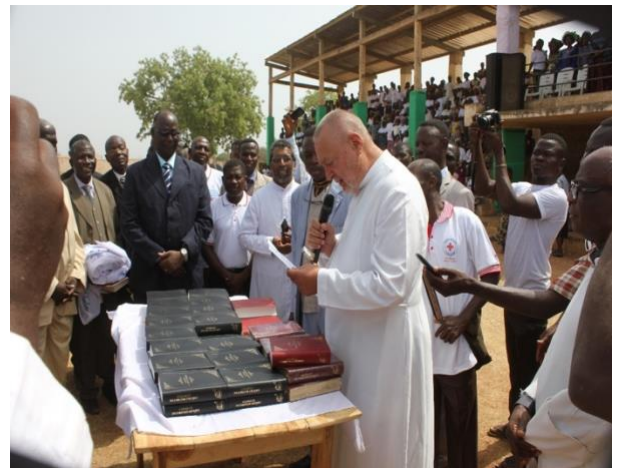

To improve literacy in N’Cam and enable communities in both countries to read, understand, and engage with the Bible in their heart language.

Key Activities

- Develop an 82-lesson literacy primer in two volumes (Book 1 and Book 2).
- Conduct a 15-day collaborative workshop in Bassar with 3 participants from Ghana and 4 from Togo to create a standardized literacy manual for use in both countries.

Timeline

November 2026: Development Workshop
2027: Pilot Printing

Budget

Material Development: \$5,000
700 copies for Pilot Printing: \$1,500
Launch and Implementation: \$1,000
Total: \$7,500

Expected Impact

- Improved literacy among Bassar communities in both countries
- Increased engagement with Scripture in N’Cam
- Strengthened local capacity
- Enhanced cross-border collaboration
